EDUCATION

Stanford University

B.S. Electrical Engineering, Minor in Economics

Stanford, CA

Expected June 2029

Coursework: Circuits I (EE 101A), Power Electronics (EE 153), Probability for Computer Scientists (CS 109) – all in progress; Linear Algebra & Multivariable Calculus, Ordinary Differential Equations, Mechanics & Special Relativity, Information Science & Engineering, Programming Abstractions (C++), Computer Organization & Systems (C).

MISK Schools – A-Levels

Riyadh, Saudi Arabia · 2025

RESEARCH

Arbaban Lab, Stanford Electrical Engineering

Undergraduate Researcher (Prof. Amin Arbaban)

Stanford, CA

Sept 2026 – Present

- Developing a diffusion-based inverse-design pipeline that generates RF passive layouts from target S-parameters, using a conditional U-Net diffusion model and a CNN forward model in PyTorch, validated with EM simulation.
- Presenting weekly progress demos and maintaining an experiment log; final deliverables are a code repository and technical report (10-week project, EE 191).

EXPERIENCE

Rewaa

Software Engineering Intern

Riyadh, Saudi Arabia

June 2026 – Present

- Built an AI-powered tool that automates auditing of ~50 NPS customer-support tickets per week, reviewing each ticket, scoring it, and generating feedback.
- Developing Rewaa Academy, an internal platform that trains new sales hires on company data and gives the sales team the resources they need.
- Contribute to development of the company's core retail-management product alongside the engineering team.

LEADERSHIP & ACTIVITIES

IEEE Stanford – MTT-S & EDS Chapters

Secretary, MTT-S | Member, EDS

Stanford, CA

2025 – Present

- Planning the newly chartered MTT-S chapter's launch event: a beginner intro-to-wireless workshop where attendees use SDR dongles to capture aircraft ADS-B signals and plot them live on a map, co-hosted with the Stanford Amateur Radio Club (W6YX).
- Coordinate chapter meetings and technical events on microwave and RF engineering; attend Electron Devices Society events on semiconductor and device topics.

HONORS & AWARDS

International Physics Olympiad (IPhO) – Bronze Medal

Isfahan, Iran · July 2024

- One of five students selected for the Saudi Arabian National Team, competing against 400+ students from over 90 countries on open-ended problems across mechanics, electrodynamics, optics, quantum mechanics, and relativity.

SKILLS

Software: Python, C++, C, Assembly, statistical analysis, mathematical modeling

Hardware: Circuit design and analysis, component integration, soldering, 3D printing, lab instrumentation

Languages: Arabic (native), English (fluent)
